

Quality Policy

Performance

Be the best supplier of advanced optical thin film coating technology for our customers with excellent quality and a competitive cost.

Partnership

Work with our customers and suppliers in a collaborative way to ensure our products meet market needs.

Principles

Apply appropriate quality management systems, principles and practices in satisfying the customer's requirements and expectations throughout all business activities. Iridian Spectral Technologies is committed to continuously improving our quality standards and maintaining compliance with statutory and regulatory requirements.

People

Have, at all levels, competently trained employees who are focused on customer satisfaction and working safely.
